

Equipment List

Simulation for Managing Hemorrhage as a Complication of Uterine Aspiration

Basic Materials: (n is based on learner groups of 3; If using groups of 2, multiply by n = ½ trainees)

- Manual vacuum aspirators (n = ⅓ trainees + 1 for demonstration)
- Dragon fruit (pitaya) or papaya (n = ⅓ trainees + 1 demonstration)
- Cannulae #9 (n = ⅓ trainees + 1 for demonstration)
- Dilators (up to size 9 Denniston or 27 Pratt) (n = 1/3 trainees)
- Foley catheters or Bakri balloons (n = ⅓ trainees + 1 for demo)
- Saline bags 0.5-1 L (n = ⅓ trainees)
- IV tubing (n = ⅓ trainees)
- Ring forceps (n = 2)
- Chux/paper towels/sani-wipes (n = # of trainees)

Optional Materials:

- Red food dye (n=1 optional)
- Instrument pack for uterine aspiration (n=1 for demonstration)
- Printed images of ultrasounds:
 - Empty uterus
 - Fluid in cul-de sac
